Research Projects Aboard the M.V. Osprey
College of the Atlantic

COA’s M.V. Osprey is a 46’ Wesmac cruiser, the sturdiest hull in its class. She is a highly adaptive work boat built specially to handle small coastal and offshore projects such as equipment deployment and recovery, moderate lifting, surveys and more. Osprey has all necessary safety and communications equipment and is inspected out to 200 nm.

Project Types
- Transects and surveys
- Equipment deployment and recovery
- Light to medium lifting
